

Be content with what we have

Are we morally responsible for what we do not do ?

No one goes to the theatre to hear the truth

One milion to spend now or 850 in solid gold - credit

It is all a metter of perspective

Why should a man be punished for speaking the truth ?

If we did not give her some nonsense about the future she would want
to understand the present

She does not have the intelligence to aply the science we give her

Pity is a weekness

Ever dissatisfied with what I have and ever curious about what I do
not know

Money out of tears ?

I have no power and without power there is no dignity

We must keep science from the people or they will not trust us to run
the world

I confess to being a human being which is to say the worst of the
beasts

I confess to creating societies that only exist for the benefit of those
in power

There is no liberty, no truth

Each new world repeats the folly of the old one

Science is a suicide and civilisation - a joke

What is the moral basis of government? What is the value of money?

What is the aim of science? And finally, when humans behave like
vicious animals why should they be valued higher than beasts?
